

PRODUCT SPOTLIGHT

PLOW BOLTS

SQUARE NECK, COARSE THREAD PLOW BOLTS

Plow Bolts are similar to Carriage Bolts with the exception that the head of a Plow Bolt tapers beneath the head while a Carriage Bolt is flat on the bottom of the head. Both the Plow & Carriage Bolts usually have a square neck to prevent turning while being installed or removed and they are often used on all types of plows, road graders, scoop shovels, farm machinery and many other heavy equipment applications. The Plow Bolts are available in either Grade 5 or Grade 8 and Carriage Bolts are available in Grade A, Grade 5 or Grade 8.

GRADE 5

ZINC AND PLAIN FINISH

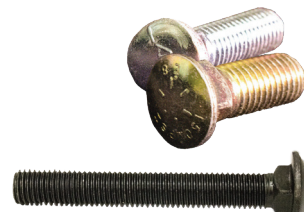

Grade 5 bolts are more commonly used. Grade 5 bolts have an approximate 120,000 pounds per square inch tensile strength.

GRADE 8

PLAIN, ZINC, AND ZINC YELLOW FINISH

Grade 8 bolts are stronger than the more commonly used Grade 5. They have been hardened more making them ideal for use in demanding applications. Grade 8 bolts have an approximate 150,000 pounds per square inch tensile strength.

Bulk Quantity Ordering

Available in package sizes of:

25 pieces ■ 50 pieces ■ 100 pieces ■ 250 pieces

**Custom quantities also available.*
